

Trend Micro Deep Security

SKU: trend-micro-deep-security · Brand: Trend Micro · Category: Cyber Security · Family: Deep Security
· Type: Workload protection platform

Overview

Agent-based and agentless protection for servers, virtual machines and cloud workloads — virtual patching buys time while integrity monitoring feeds compliance evidence.

Specifications

Licensing	Per-workload subscription (1–5,000+)
Platforms	Windows & Linux servers, VMs, containers, cloud
Modules	Anti-malware, IDS/IPS, integrity monitoring, firewall
Virtual patching	Shield CVEs without patch cycles
Container security	Image scanning + runtime protection
Management	Deep Security Manager / Cloud One console
Compliance	PCI DSS, HIPAA report templates
Support	Local T1/T2 + vendor T3

Key Highlights

- Virtual patching stops exploits pre-patch
- Agentless mode for VMware estates
- Container image & runtime security
- Cloud One workloads integration
